Postman, VS Code, GitHub

PROFESSIONAL EXPERIENCE

Jr. Odoo developer, Acespritech Solutions Pvt Ltd

12/2024 – 06/2025
Gandhinagar, India

- Worked on a custom Odoo project for an aviation client involving aircraft, components, maintenance tracking, and technical logs.
- Developed custom modules using Python, XML, and QWeb, and worked on model design, form views, and report generation.
- Gained working knowledge of Odoo's built-in modules including Sales, Purchase, Inventory, Manufacturing, Accounting, and eCommerce.
- Contributed to 5-6 in-house projects using JavaScript for backend development and business logic implementation.

PROJECTS

Clinic Management System

- Developed a complete Clinic Management System in Odoo 17 covering patient registration, doctor scheduling, and appointment booking with calendar integration.
- Implemented medicine inventory management with purchase, sale, stock tracking, expiry alerts, and linked it with automated invoicing and discount rules.
- Customized prescription generation, lab test requests, and electronic medical records (EMR) with downloadable QWeb PDF reports.
- Configured email/SMS notifications for appointment reminders, reports, and integrated role-based access for admin, doctor, and receptionist users.
- Extended res.partner to unify management of patients, doctors, and vendors, optimizing backend

performance using computed and related fields.

MRA e-Invoicing Integration

- Developed a custom module `mra_invoicing` in Odoo 18 to integrate with the Mauritius Revenue Authority (MRA) e-Invoicing system.
- Dynamically displayed and validated fields across multiple models (Invoice, Company, Product) based on the company's e-Invoicing configuration.
- Implemented secure token-based authentication with MRA's API for authorized data submission.
- Built functionality for JSON invoice export and real-time API submission with response parsing, success/failure logging, and user notifications.
- Embedded MRA-compliant QR code in the customer invoice report using QWeb, meeting all regulatory requirements.

SmartShop Voice & Product History

- Developed a custom "SmartShop" module for Odoo Website enabling voice-based product search using browser speech recognition APIs.
- Integrated direct Add to Cart functionality based on voice commands, enhancing the user shopping experience.
- Implemented automatic product view history tracking, storing recently viewed items per user session.
- Designed logic to display a "Purchased" ribbon on products already bought by the logged-in user, improving visual feedback.
- Ensured smooth integration with Odoo's website, eCommerce, and cart models using controllers, templates, and session storage.

Real-time POS Analytics Dashboard

- Developed a real-time POS analytics dashboard to track hourly sales, top-selling products, and staff performance with live data updates.
- Integrated interactive bar, line, pie, and donut charts using Chart.js to visualize key metrics such as journal-wise payments and category-wise revenue.
- Displayed weekly gross sales, average order value, and product trends through dynamic visual components and summary blocks.
- Enhanced decision-making for business users with clean KPI layouts and intuitive filters (Today, This Month, This Year) for quick insights.
